

BRYCE SEEFIELDT

Full-Stack Developer

bryce.seefeldt@gmail.com | (416) 807-4373 | Toronto, ON
bryce.seefeldt.ca | linkedin.com/in/bryce-seefeldt | github.com/bryce-seefeldt

PROFILE

Full-stack developer with a production-deployed Next.js / TypeScript application and approximately six months of active engineering practice covering CI/CD governance, security hardening, threat modeling, and operational documentation. Background includes eighteen months of enterprise transformation work at OCAD University, reporting directly to the CIO and leading three concurrent modernization initiatives across IT and operational units. Twenty years of experience inside professional services environments brings practical instincts for stakeholder partnership, requirements translation, and the cultural realities of partner-led organizations. Looking for a role where engineering rigor and transformation thinking are valued equally.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, C#, Java, Python, C, C++

Front End: Next.js (App Router), React 19, Tailwind CSS, Angular, HTML5, CSS3

Back End: Node.js, REST APIs, GraphQL, .NET

Databases: PostgreSQL, MS SQL Server, MongoDB, MySQL, SQLite

Cloud & DevOps: Vercel, Azure (Entra ID, Intune), AWS, GitHub Actions, GitLab Enterprise, Docker, CI/CD pipelines

Engineering Discipline: TypeScript strict mode, Vitest, Playwright, ESLint, Prettier, PR governance via GitHub Rulesets

Security: OWASP HTTP headers, Content Security Policy, STRIDE threat modeling, CodeQL, Dependabot, secrets hygiene

Methodology: Agile / Scrum, SDLC, ADRs, runbooks, threat models, requirements documentation (RFP, BRD, technical spec)

Design & UX: Figma, UI/UX design, HCI, WCAG accessibility, responsive design

EXPERIENCE

Independent Full-Stack Development

Oct 2025 – Present

Self-Directed Production Portfolio Program • Toronto, ON

Production URL: bryce.seefeldt.ca | Docs: bryce.seefeldt.ca/docs

- Designed, built, and operate a production Next.js / TypeScript portfolio application with companion Docusaurus documentation system, deployed on Vercel under a custom domain with a three-stage promotion model and approximately one-minute mean time to rollback
- Built a GitHub Actions CI/CD pipeline enforcing zero-warning ESLint, Prettier auto-format, TypeScript strict mode, Vitest unit coverage, Playwright E2E across Chromium and Firefox, link validation, TruffleHog secrets scanning, and Next.js build verification; PR-only merge discipline enforced via GitHub Rulesets
- Implemented OWASP HTTP security headers and Content Security Policy in next.config.ts, authored a STRIDE threat model covering twelve scenarios, and established a documented dependency vulnerability audit policy with MTTR targets
- Built a reusable evidence-first component library (EvidenceBlock, VerificationBadge, BadgeGroup) linking portfolio claims bidirectionally to verifiable documentation artifacts (ADRs, threat models, runbooks)
- Maintain a docs-as-code documentation system across eight domains; authored sixteen-plus Architecture Decision Records and a complete suite of operational runbooks covering deploy, rollback, secrets incident response, and CI triage
- Active continuous improvement through performance monitoring (Vercel Analytics, Core Web Vitals targets), bundle size regression gating (10% growth threshold), and ISR-based caching strategy

IT Services Specialist

2024 – 2025

OCAD University • Toronto, ON

Co-op placement extended to 18 months based on performance. Reported directly to the CIO, leading three concurrent transformation initiatives across 10 IT units.

Cloud Print Infrastructure Migration (Microsoft Universal Print)

- Led the full project lifecycle from feasibility study through proof-of-concept to campus-wide production rollout, migrating 50 MFPs across 10 buildings for 2,500+ users
- Deployed a dual-access architecture using QR-based print-anywhere release and Azure AD / Entra ID security groups for department-gated queues
- Achieved a 50% reduction in print-related support tickets within 3 months of go-live; eliminated a \$10,000/year PaperCut license and recovered approximately 10 hours/week of IT administration overhead
- Stack: Azure, Entra ID, Intune, Universal Print Connector, MS Server 2022, GitLab

Disaster Recovery and Business Continuity Planning (DRBCP)

- Built the institution's first formal enterprise-wide DRBCP program from scratch; authored a 25-page IT Services DRBCP overview and standardized templates for 10 IT units
- Documented 150+ cloud and on-premises services within the CMDB, engaging 30+ sysadmins and directors; enabled cross-training for 25+ secondary support admins
- Implemented GitLab Enterprise for version-controlled documentation, establishing the department's first formal review, approval, and audit workflow

Print Shop E-Commerce Portal (SaaS Procurement and Deployment)

- Served as internal IT lead for the full procurement and deployment of OnPrintShop SaaS, replacing a legacy system with limited automation capability
- Co-authored the RFP, BRD, technical specification, and testing strategy; coordinated requirements across 7 stakeholders including the CIO and four IT directors
- 8-month timeline from kick-off to live production deployment

Publishing Administrator

2014 – 2022

Warner Chappell Music Publishing • Toronto, ON

- Automated royalty reporting and tracking workflows across a multi-tier publishing system, reducing manual processing time and eliminating recurring back-office bottlenecks
- Project managed the redesign and global rollout of Warner Chappell's publishing database and client portal, coordinating with international offices, vendors, and internal teams
- Administered a catalogue of one million-plus titles with ongoing responsibility for data integrity, rights workflows, and PRO relationships across SOCAN, CMRRA, and international counterparts
- Appointed to the CMRRA Canadian Publishers Committee, advising on national copyright and licensing policy on behalf of publishers, songwriters, and rightsholders

Founder and Principal Consultant

1999 – 2022

Seven:30 Entertainment • Toronto, ON

- Operated a music and entertainment consulting firm delivering end-to-end project management for artist releases, marketing campaigns, and touring operations over two decades
- Client outcomes included certified gold records, multiple #1 national radio singles, Juno nominations, and Canadian Radio Music Awards
- Built long-running partnerships with Sony/BMG, Rawkus Records, Red Bull Music Academy, and Nike

EDUCATION

Honours Bachelor of Technology in Software Development

2020 – 2025

Seneca Polytechnic • Toronto, ON

Four-year full-time degree. Core curriculum: TypeScript, JavaScript, C#, Java, Python, C/C++, React, Angular, Node.js, REST APIs, mobile development (React Native), cloud platforms (AWS, Azure), SQL and NoSQL databases, UI/UX design and HCI, information security, Agile/Scrum project management, and systems analysis. Co-op fulfilled through an 18-month placement at OCAD University.

Foundations of Project Management

2013 – 2014

University of Toronto • Toronto, ON

PMBOK methodology, project planning, risk management, and stakeholder management.
